Business Architecture

[Register \(/en/xplus/business-architecture/subscribe\)](#)

This training lays the foundation of a Business Architecture practice.

In groups of max. 10 people, you'll build up hands-on experience through a single end-to-end case.

Learn the discipline of Business Architecture by creating holistic, multidimensional business views of capabilities, end-to-end value delivery and information and organizational structure. Build up efficiency in the collaborative elaboration of strategies, products, policies and initiatives. Experience techniques to involve stakeholders.

To maximize the effect of this training, the examples are adapted to the problem domain of your company through co-creation workshops with your Business Architecture practice lead.

Trainers are selected on request.
